

Chisago County Health and Human Services Public Health Division

FOR IMMEDIATE RELEASE

(10/27/20)

New Chisago County COVID-19 Data Dashboard **MEDIA ADVISORY**

Chisago County Public Health is carefully tracking data related to the spread of COVID-19 in our communities. The Chisago County COVID-19 Data Dashboard is updated daily by 12:00 p.m. and includes cases reported through the previous day. The investigations are ongoing and information on the website is likely to change as cases are investigated. Public Health officials are committed to providing accurate and reliable data to the public. Additional data may be added over time. Please read the data notes related to each chart to understand any limitations in reporting.

The [COVID-19 Data Dashboard](#) includes daily and cumulative data on:

- Confirmed cases
- Hospitalizations
- Deaths
- Released from isolation
- New cases by week
- Confirmed cases by age
- Percentage of positive cases among residents
- Percentage of population tested

Data should not be used to determine your individual level of risk or to self-diagnose. Cases represent a place of residence and not necessarily where transmission may have occurred. There is community transmission across the entire county and everyone should follow recommendations to protect themselves and slow the spread of COVID-19.

For more information about COVID-19, visit @ChisagoCountyPublicHealth on Facebook.
