

# LAWNS TO LEGUMES DEMONSTRATION NEIGHBORHOOD

## POLLINATOR SHORELINE BUFFERS

Photos: Shoreland buffer demonstration projects

Five shoreline native buffers were installed on Spider, Kroon, South Center, and South Lindstrom Lakes as part of the Chisago Soil and Water Conservation District's (SWCD) Lawns to Legumes Demonstration Neighborhood program. These shoreline buffers provide critical pockets of pollinator habitat while keeping shorelines stable and filtering runoff before it enters the lake. Landowners are responsible for the maintenance of these projects to ensure their continued success.

### Partners:

- MN Board of Water & Soil Resources
- Chisago Lakes Lake Improvement District
- Chisago SWCD

### Total Plants Installed:

3,841

### Total Area of Shoreline Protected:

15,361 Square Feet

### Targeted Water:

LID Watershed

### Completion Date:

11/15/2021

### May I Visit?

Yes – All buffers have pollinator signs and can be viewed from the water
