

CRAIG PELTIER

WASCOB & DIVERSION

A Water and Sediment Control Basin (WASCOB) was installed to stop erosion in a field gully on this property. In conjunction with the WASCOB an old drainage ditch, which was actively eroding, was closed using a direct intake riser and tile. The area around the intake will be planted with permanent vegetation. The producer will not till the field in the fall, which will reduce erosion during the non-growing season.

Partners:

Landowner
Chisago Lakes Lake Improvement District
Chisago Soil & Water Conservation District

Pollution Reduction:

Total Suspended Solids: 4 tons/year
Total Phosphorus: 4 lb/yr
(BWSR Spreadsheet)

Targeted Water:

North Center Lake

Completion Date:

May 2016

May I Visit?

No – These projects are entirely on private property. Please respect private property.
